CAREER PROFILE – JUNIOR WEB & SOFTWARE DEVELOPER

A result-oriented graduate from the British Columbia Institute of Technology and Lighthouse Labs with work experience in the Web Development field. Skilled in developing responsive websites, web applications, and application databases using programming languages, frameworks, and tools. Demonstrated the ability to work collaboratively within a team to complete projects on time.

SKILLS AND COMPETENCIES

Languages: JavaScript, HTML, CSS, PHP, C#

Frameworks and Libraries: NodeJS, AJAX, ReactJS, jQuery, Bootstrap, ASP.NET

Databases: Relational Databases (using PostgreSQL and Microsoft SQL Server Management Studio), Document Databases (using MongoDB)

WORK EXPERIENCE

Evo North Technologies Inc. (Part of Evolution Group)

Junior Web Developer - Helpdesk Technical Support

August 2023 - November 2023

Delta, BC

- Have been involved in updating both the front-end and back-end functionalities and performances for the Evolution Group's website. Contributed to updating the UI of the website, added new features using JavaScript, and updated SQL queries written in Classic ASP. Apart from working on that project, occasionally I was involved in resolving tickets for the clients, mostly SQL-related issues.

Phase 1 Systems Corporation, Burnaby, BC

Volunteer, January 2020

- Performed volunteering regarding repairing, troubleshooting, hardware and software installation diagnostics and virus removal.

EDUCATION

Software Systems Developer

Certificate, September 2022 –May 2023

British Columbia Institute of Technology, Vancouver Downtown, BC

Applied Web Development

Associate Certificate, September 2020 - July 2022

British Columbia Institute of Technology, Burnaby, BC

Web Development

Diploma, August 2021 - November 2021

Lighthouse Labs, Vancouver, BC

RELEVANT PROJECTS

2021 - 2023

Dedicated more than 75% of time to develop and create the following projects as part of the bootcamp and programs. Utilized creativity and coding skills to build full stack web applications from scratch.

- Bank Account Application (ASP.NET-based website to modify bank accounts)
- Tweeter (a Twitter clone, where the user can make a tweet)
- Scheduler (React-based website to book an appointment with a mentor)
- Auto World (simple car selling/buying website)
- Tiny App (URL shortening website with possibility to edit/delete it on a later stage)
- Glendale Limo (A responsive website, where the user can book an appointment)
